SC27P SELF CONTAINED CORONA DISCHARGE

SC27P - SELF CONTAINED OZONE SYSTEM

FEATURES:

- Turn-key & pre-plumbed
- Compact, wall-mounted
- Stainless steel or powder coated steel construction
- Dual pressurized reaction chambers
- Integrated dissolved ozone monitor
- Adjustable ozone output to meet any demand

BENEFITS:

- Better Sanitation – Complete disinfection on contact
- Eliminates odors – Powerful, but safe, oxidation
- Saves money – Reduces or eliminates chemical use
- Saves time – Disinfectant produced on-site (no storage, mixing or handling of chemicals)
- Protects the Environment – Ozone reduces waste water pollutants

ClearWater Tech, LLC offers the SC27P self-contained, wall-mounted sanitation system for a variety of water applications. Ozone is the most powerful oxidizer commercially available, up to 1.5 times stronger and many times faster acting than chlorine, and is unmatched as a disinfectant.

Unlike traditional antiseptics, ozone is produced on-site with equipment that can easily be sized to meet any requirement. Ozone-enriched-water (OEW) not only sanitizes surfaces on contact but is completely safe. Ozone also leaves no harmful residue in water to harm the environment.

The SC27P is a reliable, oxygen fed ozone system designed to operate in a wide range of environments. High-concentration ozone output (6% by weight) tackles tough water treatment and sanitation applications.

The SC27P ozone generator produces 27 grams per hour @ 6% and has equal or greater sanitation power than 54 grams per hour @ 3% or 162 grams per hour @ 1%.

SC27P APPLICATIONS:

- Dairies
- Potable Water
- Large Residential Swimming Pools
- Commercial Swimming Pools
- Food Sanitation
- Surface Sanitation
- Breweries
- Wineries

SC27P SPECIFICATIONS

DIMENSIONS	ELECTRICAL	OZONE OUTPUT
29" w x 13" l x 34" d 130 lbs	120V/60Hz, 9 amps, 1080 watts 240V/60Hz, 4.5 amps, 540 watts	27 grams/hr @ 12 SCFH (PSA oxygen) 6% concentration by weight
